EL PASO DRUGGIST

WEDNESDAY MORNING

Miss Minerva Davison the Bride—Honey-moon Will Be Spent in California Coast Cities.

Richard William Knoblauch and Miss Minerva Davison, were married Saturday morning, at the residence of the bride's parents, Mr. and Mrs. W. S. Davison, in the Lakota flats.

About 30 guests were present, and refreshments were served. Rev. J. P. Rice, of the First Christian church officiated, and after the ceremony the couple departed for a California honeymoon.

Mr. Knoblauch is manager of the Knoblauch Drug company. Miss Davison, with her parents, came to El Paso a year ago from Roswell, N. M.

RAILWAY GRADING AND BRIDGES.

Department of the Interior, United States Reclamation Service, Washington, D. C., June 25, 1910.

Sealed proposals will be received at the office of the United States Reclamation Service, Room 15, Chamber of Commerce Building, El Paso, Tex., until 2 o'clock p. m., August 9, 1910, for constructing the roadbed, bridges and culverts for a branch railway from the A. T. & S. P. Ry., at a point between Engle, N. M., and Cutter, N. M., to the Engle dam site, near Elephant Butte, N. M., a distance of about ten miles.

The work involves the excavation of about 14,000 yards of earth, 50,000 yards of rock and the placing of approximately 400,000 feet B. M. of timber. Further particulars may be obtained from the office of the United States Reclamation Service, Washington, D. C., El Paso, Texas, or Elephant Butte (near Engle), N. M.

R. A. Ballinger, Secretary.

BOUNDARY COMMISSIONER

WILBUR KEBLINGER HERE.

Wilbur Keblinger, new secretary of the international boundary commission, and secretary to Gen. Mills, is in El Paso to investigate the Chiricahua case.

Mr. Keblinger is also here in the interest of the special commission on distribution of the water of the Rio Grande. He will remain two weeks in the city.

SYNDICATE CONSOLIDATES VALUABLE BURRO MOUNTAIN DISTRICT MINES

Property Comprises 3000 Acres—J. W. Bible in the Deal.

Silver City, N. M., July 18.—It is now known that J. W. Bible, of Grant county, has perfected one of the largest consolidations of copper-bearing ground in the Burro mountain mining district. The work of this consolidation has been going on for several months and during this time the attorneys and mining men have been quite actively employed in acquiring options from the numerous owners scattered over the country. It is learned from a reliable source that all gaps have been closed and the largest block of so-called porphyry-copper ground situated in this district has been leased and bonded to Mr. Bible, who, it is believed, represents a large copper syndicate.

Through the instrumentality of Mr. Bible the General Electric company became interested some six years ago in the El Ferro, Hanover and Santa Rita districts and later purchased the large mining interests now owned and operated by the Hermosa Copper company. It was also through him that the Chino Copper company learned of the large deposits and value of the ore of the Santa Rita district.

The group which has been consolidated is so located as to cover practically the entire width of the belt of the so-called porphyry-copper zone, the total length of the mineralized area along the strike, which is north and south, being approximately three and one-half miles in length, and will average something over one mile in width. The boundary line on the north adjoins the Savanna, Mankas and Burro Mountain Copper companies, while the south boundary line adjoins the Azure Mining company and Tullock group of mines.

The ore occurs as a chalcocite disseminated through the porphyry. The leached zone varies from 80 to 225 feet. This grade extends into the country any one, which, according to the best information obtained, will average about 4 percent copper and extends in depth from 350 to 800 feet, as demonstrated by the various copper mining companies now operating in this district, both on the north and south ends of this porphyry copper belt, and by the numerous shafts and drill holes and miles of underground workings.

It is important to note that the limits of the ore zone in this district, so far as demonstrated, exceed in total area of commercial ore any of the copper porphyry properties known at this time in the southwest.

Mining men familiar with the conditions existing on the group of claims Mr. Bible has consolidated, are of the opinion that the property with its large amount of well located virgin territory, by the use of drills, can be proved up at a very small cost, and by carrying on the drill work in a systematic manner, millions of tons of commercial ore can be practically called blocked out monthly.

Secret Combine. The negotiations for the options on this large body of mineral land have been conducted quietly and secretly, and it is not yet known what the syndicate is that is contemplating the purchase of this large proposition, and when approached on the subject Mr. Bible stated he had nothing to give out for publication.

U. S. POSTAL SAVINGS

Washington, D. C., July 14.—The American National bank at Paris, Texas, has asked to be designated a depository for postal savings banks funds.

QUERETARO MINE PAYS DIVIDENDS

Operating Company Issues Report—Power Secured For Development.

The Adjuclitlan Mining and Milling company, owner of the Santo Tomas and other gold-silver mines in the state of Queretaro, Mexico, which were worked formerly by Spaniards and later promoted by J. C. Brennan, Bert Peterson and Clifton Crowell, has just issued its annual report covering the work done for the year ending March 1, 1910. It shows that 26,563 tons of ore were mined and milled, of a total value of \$484,752.16, at an expense of \$329 per ton, while the milling and cyaniding cost \$2.92 per ton, meanwhile dividends amounting to \$75,000 were paid to the stockholders and the sum of \$56,306 was expended on permanent improvements on the property.

Capacity Enlargement Planned. The intention of the company is to bring the capacity of the mill up to 3000 tons a month as soon as sufficient power can be obtained to operate additional machinery. It was originally equipped with 1500 and Huntington mills with a capacity of over 500 tons a day, the process being dry crushing and cyaniding.

The new dam of the power company should be finished this month when 400 horse power will be delivered to the mines and mill from the electric plant, which will increase the output and reduce the cost of milling and cyaniding. An air compressor and also drills are being installed.

The total development during the year was 890 meters or 2920 feet, done mostly on ore already discovered. Other improvements are new buildings, office buildings, residences for the superintendent and other officers, and seven double houses for workmen and families.

The property of the Adjuclitlan company is claimed to be practically unexplored.

CHINO COPPER CO. PLANS A NEW MILL

Townsite Planned Near Site of Proposed Structure at Santa Rita.

Silver City, N. M., July 18.—The Chino Copper company will install its steam shovel equipment this month. Only a portion of the big ore deposit has been developed as yet, the present tonnage being up to 15,000,000 tons mark, and it is a little early to state just how much of the Chino ground is capable of steam shovel mining, but it is believed that fully 40 percent of the mineralized area can be reached by this modern method.

The work in mill, power plant and machine shop construction is advancing very satisfactorily, and the mill management will accomplish its share of the task by having the ore in shape for mining when the big mill is ready for operation. The mill will have a capacity of 3000 tons every 24 hours. The ore will average 2 1/2 percent copper, occurring as a chalcocite and metallic copper disseminated through the porphyry mass.

The mill will be located a distance of ten miles from Santa Rita, on what is known as the B ranch, which the Chino company purchased recently from the Victoria Land and Cattle company for its valuable location and large water supply, and a distance of one mile from Hurley station, on the Santa Fe branch from Whitewater to Santa Rita.

The company has planned a townsite near the location of the mill, but the same will be under the control of the company.

A branch store of the Santa Rita Store company has been opened at this point, and the grading of the track for the branch railway from Hurley to the mill has practically been completed and the rails for the track are now on the ground.

TYRONE COMPANY PLANS

FOR MUCH DEVELOPMENT

Improvements contemplated in the Near Future to Increase Production at Silver City Shaft Work started.

Silver City, N. M., July 18.—The Tyrone property, situated in the Burro mountain district, of which Maurice P. Johnson, of Salt Lake City, Utah, is the general manager, has been mapped out for a development campaign. Shaft work is now under way and churning drill will also be done to hasten a knowledge of the resources of the property.

After the shaft has penetrated the leached copper zone, the company will then do from 4000 to 5000 feet of cross-cutting. The deposit is not thought to be covered with very much overburden. The shaft is directed in line with the workings on the Chemung property, which is an adjoining property, and the trend of the deposit on the Chemung undoubtedly extends through the Tyrone property. Both the Chemung and Burro mountain companies now have several millions of tons of commercial ore developed.

NEEDFUL KNOWLEDGE

El Paso People Should Learn to Detect the Approach of Kidney Disease.

The symptoms of kidney trouble are so unmistakable that they leave no ground for doubt. Sick kidneys excrete a thick, cloudy, offensive urine full of sediment, irregular of passage or attended by a sensation of stinging. The back aches constantly, headaches and dizzy spells may occur and the victim is often weighed down by a feeling of languor and fatigue. Neglect these warnings and there is danger of dropsy, Bright's disease, or diabetes. Any one of these symptoms is warning enough to begin treating the kidneys at once. Delay often proves fatal.

You can use no better remedy than Doan's Kidney Pills. Here's El Paso proof:

T. Stapleton, lawyer, 1011 Myrtle Ave., El Paso, Texas, says: "Years ago I suffered from a severe case of Bright's disease. My kidneys were much disordered, which was shown by the unnatural condition of the kidney secretions and finally my ankles began to swell. At that time Doan's Kidney Pills were brought to my notice and I procured a box at Kelly & Pollard's drug store. They entirely removed the swelling from my ankles and benefited me in every way."

For sale by all dealers. Price 50 cents. Foster-McMullen Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

SENTENCE SERMONS IN PULPITS OF EL PASO

The church of Jesus Christ is a definite thing and its mission in the world is to conserve the truth and preach the gospel to all nations.—Rev. R. T. Hanks, at Calvary Baptist church.

Any confession of faith which will meet the approval of the Savior, must first of all be one's own, born of his own experience and study.—Rev. Perry J. Rice, at First Christian church.

The only immeasurable, impassable, infinite distance is that which the sinner puts between himself and God by committing sin and clinging to it.—Rev. Caspar S. Wright, at Trinity Methodist church.

The man of faith, thought and purpose is to carry out Christ's dream of universal conquest and make it a reality, to help establish His kingdom of loving brotherhood.—Rev. C. O. Beckmann, at First Methodist church.

The two great facts upon which the destiny of the world depends, are truth and righteousness, and we must find out the truth and regard it, and righteousness is doing the truth.—The Right Rev. J. M. Kendrick, bishop of New Mexico, at St. Clement's Episcopal church.

Have Christ in the heart and every emotion will chord with love, every thought will harmonize with love and every resolve will manifest the spirit of love.—Dr. H. E. Wright, at First Presbyterian church.

King Jehonkin sent for the scroll and had it read in his presence, and because it displeased him he cut it with his penknife and cast it into the fire; many Jehonkins are still trying to cut from the Word such parts as displease them.—Rev. A. J. McElwain, at Houston Square Baptist church.

The half way kind of Christian is one who has enough religion to make him unhappy at a dance, or in a Sunday theater or vaudeville, and yet not enough religion to make him happy in a prayer meeting or in the daily reading of the bible.—Rev. Robert Bruce Smith, at First Baptist church.

News of El Paso Churches

Houston Square Baptist.

The Aid society meets Tuesday afternoon at 4 o'clock.

First Methodist.

Rev. C. O. Beckmann has begun a series of Sunday evening sermons on Jesus. His topics for the next three weeks will be Jesus the Friend, Jesus the Lover, and Jesus the Savior.

The Aid society meets at the home of Mrs. Soper, 308 Mundy avenue, Tuesday afternoon at 4 o'clock. There will be a business meeting of

the church Wednesday evening at 8 o'clock.

First Christian.

The Christian Endeavor society will have a monthly business and social meeting at the home of Rev. P. J. Rice, 315 Lee street, Monday evening.

The W. C. T. U. will hold services at this church all day Friday.

On July 31, E. M. Rains, of Cincinnati, Ohio, secretary of the food conservation missions, will preach both morning and evening. He is on his way to make a tour of the non-Christian nations.

MINING AND OIL NEWS.

JEROME ORE STRIKE

PROMISES PRODUCTION

Machinery Ordered for Arkansas-Arizona Property, Jeromide Company Has Development Work Under Way.

Jerome, Ariz., July 18.—The development of the large ore body in the Verde extension continues. This strike is proving a bonanza, and it is expected it will be classed with the big mines of the world.

The Arkansas-Arizona company is waiting its machinery, ordered some time ago, to be shipped to the mine. The most complete in the west.

The Mesquite company has purchased the claims of Owen and Allison, about a mile and a half south of Jerome, which are within the zone of proved copper ground. Considerable work has been done on the property.

At the Jerome-Verde everything is in readiness to start up with exception of a few small pieces of machinery. When the machinery is received and the large pump is installed below, and the large development will be rushed. Power will be conveyed by the line of the Arizona Power company.

Arizona Copper Company.

John Gill, chairman, and Mr. Miller, secretary of the Arizona Copper company, are in New York from Edinburgh, Scotland, although operating in Clifton, Ariz.

ALTAR AND QUILTOJA MINES

ATTRACTING PROSPECTORS

Americans Numerous in Mexican District, Which Is Divided by Arizona Ore Fields; New Machinery.

Bisbee, Ariz., July 18.—While the Altar district is at its zenith and scores of Americans are flocking there to denounce ground not already taken, two other districts are attracting attention, the Llano and the Quiltoja districts, the former in Mexico and the latter in Arizona.

The Llano region extends for several miles along the south of the Altar district and some parts of it are covered by a railroad line, thus making it an ideal field as far as transportation facilities are concerned. The ground was first worked by Jesuits and later by Spaniards and Indians, who exploited only the surface, abandoning the place.

Some successful mining operations lately put through, have brought the district to public attention, and from the acreage already denominated it is assumed that there will be great activity there.

The Quiltoja district is located in Arizona and in the past has been generous in its yield of gold. Many claims have been staked in this district, but owing to the fact that the mineral is difficult to separate, no work worthy of mention has been done so far. A deal was closed a few weeks ago whereby a Quimor machine will be brought to the ground and start operations by next fall.

ORE VALUES ARE PROVED

IN DRAGON MOUNTAINS

Middlemarch Property, With Record of Old Producer, Still in Good Ore; Development Work on Marble Mine.

The copper mines in the Dragon mountains, in Arizona, are being actively operated and yielding a good quantity of ore. The Middlemarch mines, with a good record in the past as a producer, in its recent development shows that the sulphides extend in three directions, to an enormous extent. There seems to be no bottom in the ore. This sulphide carries 20 percent copper, 10 gold and some silver.

Another mine in the Dragon mountains banking a fine showing is the Marble. An expenditure of \$25,000 has been made on development work and improvements, consisting of a tunnel 475 feet long, and a shaft 400 feet deep. Hand drills are being used in drifts both ways from the shaft at the 200 foot level. Good milling ore is found.

SONORA MINING COMPANY

CONCENTRATES WORKINGS

Silver-Lead Ore Body Is Found in 150 Foot Shaft; W. E. Robertson, of El Paso, Heads Operating Company.

The Sonora El-Metallic Mining company of which W. E. Robertson, of El Paso, is president, which is operating

mines near the Sonora river, in Sonora, where it holds an area of 225 percent class, is now concentrated on a silver-lead ore body. A shaft has been sunk to a depth of 150 feet in order to operate the old workings. Drifting has been done on two levels, at 83 feet and 150 feet, developing a four foot vein of good ore.

An extensive body of copper ore, which is distinct from the silver-lead ore, is being developed by a double compartment shaft sunk on the foot wall. The shaft is in good ore on three sides. The general formation is lime-porphry. The total development work aggregates over 1000 feet.

The company uses a 120 horse power steam 48 inch double drum hoisting engine, two 65 horse power boilers and one fingersoll-Sargent 10 drill air compressor. Water is brought from the Sonora river a mile and a half distant.

PARADISE MINE INCREASES

FORCE; DEVELOPMENT UNDER WAY

Paradise, Ariz., July 18.—A second shift has been put to work at the Leadville shaft of the C. & P. Co. A third shift of miners will be put on this month. Mining timbers and lumber and sheet iron roofing are being hauled to the camp.

In addition to stoping on reaching the 200 foot level, the company plans running a crosscut from that level to the Colorado vein to prove its value with depth, the latter vein being on an adjacent and parallel claim to the Leadville. W. V. Richards is in charge of the mine.

UNEXPECTED ORE BODY IN

ARIZONA COMMERCIAL SHAFT

In the Arizona Commercial, a rich strike has been made in the Eureka shaft at a depth of 35 feet below the 700 foot level. The ore shaft cut the ore body. The shaft is now all in ore carrying copper carbonates and copper glance. It is believed that this indicates a horizontal faulting of the vein, and explains a body of ore higher up in the shaft was unexpected.

CINCO DE MAYO SILVER

PROVES OF HIGH GRADE

A. J. King, general manager of the Cinco de Mayo and other properties in the Moctezuma district of Sonora, Mexico, is at the St. Regis. Mr. King says that things are moving along nicely and he anticipates a big haul. A lot of high grade silver ore from the mine and is now shipping the second one of 54 tons to the smelter. The ores of the Cinco de Mayo are of extreme richness and apparently unlimited in extent.

KINGMAN MINE PROSPECTS FOR

WATER TO OPERATE BIG MILL

Kingman, Ariz., July 18.—At the Bl-Metals mines six miles southwest of Kingman, a large number of wells are being sunk to develop water for the big 40 stamp mill proposed to be built by the owners. Should water not be obtainable at the mines, the plant will probably be erected at Kingman.

The Bl-Metals mine is capable of sending out a daily output of 500 tons of ore of a value that will pay to mill at Kingman.

MILL FOR SONORA PROPERTY.

The Sonora Central Mines company operating the Santo Domingo mine, in the vicinity of Alamos, Sonora, is erecting a concentration mill and installing machinery for a 100 ton mill. The mine is one of the more noted antiquities in the Alamos district. The development work in the last few years has opened up large bodies of rich ore.

EIGHT FOOT ORE SHOOT.

In the bottom of the Montoya shaft of the Santa Fe mine in Cananea, a foot of ore eight feet wide has been opened up and is widening with depth. The ore is silver-lead-zinc.

A Millionaire's Baby

attended by the highest priced baby specialist could not be cured of stomach trouble any quicker or surer than your baby if you give it McCreedy's Baby Elixir. Cures diarrhoea, dysentery and all derangements of the stomach or bowels.

Price 25 cents and 50 cents. Sold by all druggists.

EL PASO MINISTER DISCUSSES CIVIC PROBLEMS FROM LOCAL VIEW POINT

El Paso's Location Excellent For a Great Educational City.

At the First Christian church Sunday evening the pastor, Rev. P. J. Rice, delivered the first of a series of lecture sermons on "The Modern City." The theme of the lecture was "A City in the Making." In the beginning Rev. Mr. Rice stated that while reared in the country he had been a pastor in cities ranging in population from 20,000 to 2,000,000 all his professional life. He said:

"I claim no expert knowledge concerning city problems, but I have tried to be a student of conditions and believe I have some right to speak. I have been a resident of this city nearly a year and feel a keen interest in its growth and development, which has been so phenomenal in the recent past and which presents so much of promise for the immediate future. I have great sympathy with the mayor of any city. He has, in my judgment, a harder job than the president of the United States. The office calls for ability and patriotism of a high order and for a spirit of unselfish service for the good of others. Besides all who are charged with responsibility, are aiming at improvement and we should be patient with each other for the problems are huge.

Cities Grow Rapidly.

"The rapid growth of cities is one of the striking features of modern civilization. At the beginning of the nineteenth century the United States had but six cities of 8000 or more inhabitants. At the beginning of the twentieth century there were 345 such cities in our territory. In 1800 less than 4 percent of the population lived in cities. In 1900 33 percent of it was urban. It took the city of New York 175 years to become as large as El Paso is at the present time. In the next 50 years it gained 250,000; in the next 30 years it gained 630,000, and from 1850 to 1890, the next period of 21 years, it gained \$39,000. Numerous cities, not only of America, but all over the world, have experienced similar growth, and this means of people has created many problems, most of which we are still trying to solve.

Thus in practically every particular, cities are still in the making. "Physically this is true. Houses are constantly being built, business blocks are being erected, streets are being improved; parks are being laid out and beautified; telephones are being installed; gas and water pipes are being laid and street car tracks are being extended. One seldom travels a block in any city without witnessing some unfinished situation.

El Paso an Able Exponent.

"All this is preeminently true of El Paso. Some severe criticisms of her appearance might be made if one did not remember that it is a city in the making and that the unfinished appearance is but a condition incident to rapid development. There is great need, however, for a very unusual amount of civic pride to dominate all our citizens if this city is to be made as attractive as it may be. A permanent grade should be established and followed and greater care should be exercised in the laying of walks that they may be more nearly regular in width, design and grade. Private lawns should be carefully cultivated and cleanliness should be considered a virtue next to godliness.

Manning of Population a Problem.

"The housing of great numbers of people is one of the important problems incident to the making of a city. People cannot live healthily or morally in cheap and unsanitary shacks. Hundreds of thousands of people die every year simply as the result of the neglect or the greed of owners of tenements. The recent report of El Paso's health department shows the conditions here to be deplorable indeed. Even north of the tracks the conditions are not beyond criticism. Cottages have been built too near the street, both in point of distance from it and in elevation.

"The care of the sick and indigent classes is another problem of gigantic proportions. It is particularly important in this city, and notwithstanding the efforts that are being made by the health department of the city conditions are deplorable. This is naturally a health restoring climate. As cordially as it can, with safety to itself, El Paso should say to every sufferer

with the great white plague, 'Come bathe in the warm sunshine of our summer and our winter days, breathe the pure air of our high altitude and rest in the cool of our balmy nights, and get well.' But both for her own protection and for the sake of those who come the fullest possible provision should be made to care for all such sufferers under conditions that will not endanger the health of those who are already here, and especially of the poor of the city.

El Paso Needs More Schools.

"Educationally and religiously, cities are still in the making. In both particulars great progress is being made, but there is still much to be done. Every city is proud of its public schools as it well may be. But one does not need to go very far into social conditions in any city to know that great numbers of children are for one reason or another deprived of a fair share in their benefits. It is possible for our schools to become far more democratic than they are. In El Paso our schools are needed. Situated as she is, so widely separated from other great centers, there is every reason to hope that this city will develop into a great educational center as well as a commercial and industrial center.

City's Churches a Great Asset.

"Religiously there is much to be desired. We are proud of our fine church structures, but it is a serious question if our people are religious. Multitudes are indifferent to the ringing call of Christ to lives of righteousness and service. In this city a program of wise evangelism is greatly to be desired. Evangelism of the right sort would tone up the life of the whole city and make it easier for everyone to do right and harder to do wrong. The whole situation calls for the immediate action of men of high purpose and noble selfishness.

"There is a phrase going the rounds which runs like this: 'God made the country and the devil made the city.' I object to the phrase. It is not true. Cities are still in the making and as truly as any where God and man are cooperating. The devil may be taking a hand in the labor also, but we can beat him if we try. The fact that there is something to do, something to arouse one's energies, to call forth one's best efforts is what makes the city invitingly fascinating.

Local Opportunities Many.

"If you don't want to engage in the work of city making go to Pasadena, where everything has been done. But if you enjoy the struggle, if you like to feel your blood tingle, and your ambition rise to meet difficult situations, stay in El Paso. Here every citizen who will, can throw himself or herself into the labor of city making with abandon, and may have the joy of seeing some fruits from his labors. By the grace of God every man ought to say, 'I'll do my best to make El Paso a city beautiful, healthful, righteous.'

A. S. Pierce, of the Alamoso Stone

and Marble company, was here Saturday with samples of the Alamo marble, which his company is preparing to place on the market.

Haymon Krupp left Sunday for New

York and Boston to purchase goods for his new wholesale furnishing store which will be opened on South El Paso street.

ICE CREAM
